

Priority 5

Objective 3:

Sustainable and attractive communities

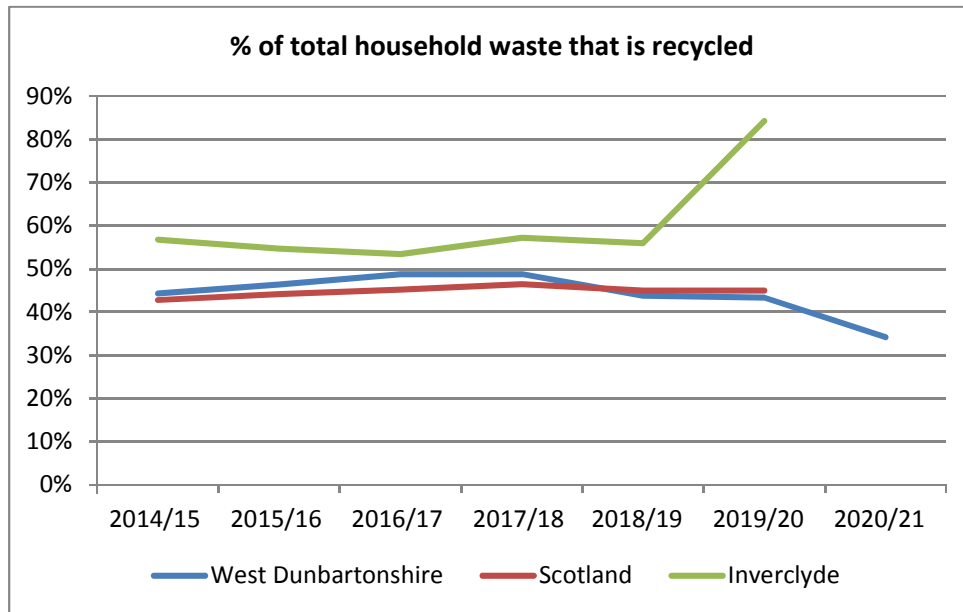

Indicator:

% of household waste that is recycled

Target:

58%

What does the data say?

Results for 2020/21 show the target was not met. A decrease in performance resulting in a 4.8% point decrease over the last year. Performance sits below both the Scottish average the statistical neighbour of Inverclyde.

Covid-19 has severely impacted performance largely due to pausing the brown bin collection and the closure of Civic Amenity sites during the pandemic. The creation of a new dry mixed recycle contract will help to improve the percentage of waste recycled within households going forward.
