

# Priority 5

## Objective 1:

A continuously improving Council providing best value

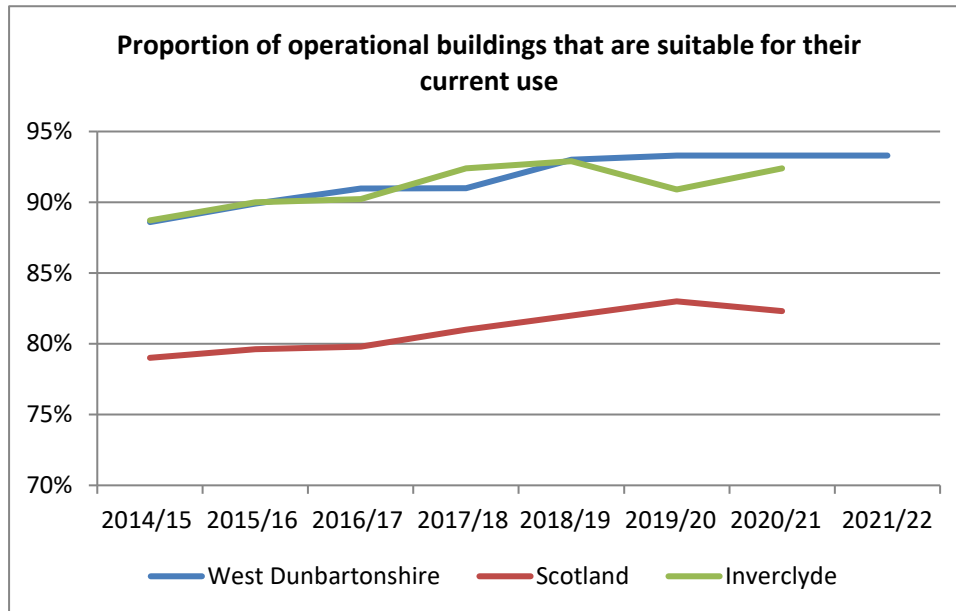

## Indicator:

Proportion of operational buildings that are suitable for their current use

## Target:

93%

### What does the data say?

The latest results from 2021/22 show a stable position continued from the previous year.

Work continues across various services to ensure that operational buildings are suitable for current use. This is regularly monitored and processes are in place to accommodate any changes required across the authority to ensure that the suitability for current use is achieved.

Performance has consistently exceeded the Scottish average and in recent years exceeded the performance of our statistical neighbour Inverclyde.
